FIORE Statuario is a lamp that represents a vision to transform the weight of marble into an expression of raw lightness, showing, at the same time, the stone's versatility. Despite the robustness of the material, FIORE Statuario introduces meticulous techniques that challenge the boundaries of marble – the stone was excavated to the limit in order to explore all its translucency, using the manual work of artisans and ancient techniques. The aluminum base reflects the concern to make the object lighter and combines state-of-the-art technology and manual work that works as a catalyst to this creation.
